

Matthew F. DeAngelo

Software Engineer

Jack of All Trades

Master of One

Six (6) years experience in software engineering as a **full-stack** focusing on **back-end** predominantly using **Object Oriented Programming (OOP)** languages such as **C# (.NET Framework & .NET 8)**, **Java**, **Golang (Go)**, **C++**, and **Python**.

Frequent use of front-end tech stacks to include **Javascript (JS)**, **Node.js**, **npm**, and **jQuery**. Experience using **reactive frameworks** such as **Vue.js (Vue 2&3)** in both the component and Javascript methodologies. Historical use of C#'s **WinForms** and **WPF**.

Strong understanding of **relational databases (RDBMS)** including **SqlServer (SQL)**, **PostgreSQL (Postgres)**, in addition to **non-relational (NoSQL)** databases including **DynamoDB (AWS)**, **Azure Blob Storage**, and **Firebase Realtime Database**.

Daily use of **Integrated Development Environments (IDE's)** such as **Visual Studio 2022 (VS2022)**, **Visual Studio Code** and other tools to include **Terminal (command line)** and **SQL Server Management (SSMS)**. Strong understanding of **Git** (Ask me questions!) using multiple different **version control** servers including **GitHub**, **GitLab**, and **Azure Devops**. Use of **Linux** for side project development and **Vim (Vi & NeoVim)** as my code editor of choice.

Performed **Devops** functions such as deploying applications to an **Internet Information Services (IIS)** server hosted on a **Virtual Machine (VM)** in the **Azure** cloud. Daily use of **Containers (Docker)** to perform manual testing, occasional personal use of **OracleBox (VM)**, and historic professional use of **VMWare (VM)**.

A determination to adhere to industry standards such as **Clean Code** and **Design Patterns** with a fascination towards security practicing **Penetration Testing (PenTesting)** in my free time. Occasional implementation of **Domain Driven Design (DDD)** and **Test Driven Design (TDD)**. A strong understanding of **Concurrency**, knowing the distinction between **Asynchronous (Async/Await)** programming and **Threading** with a natural talent for **Algorithms** and **Data Structures**. A deep understanding of **HTTP (networking)**; I can even explain **Cross-Origin Resource Sharing (CORS)**.

Introduced **Pull Requests (PRs/Code Reviews)** and **Automated Testing (Unit, Integration, and End-to-End tests)** into my current team's **Agile** culture and **Continuous Integration/Continuous Delivery (CI/CD)** pipeline. Leading **System Architecture (System Design)** changes and driving changes by **mentoring** junior developers.

Honors Bachelor's in **Mathematics** and **Computer Science (CS)** and certifications in **CompTIA Security+ (Sec+)** and **Azure Developer Associate (AZ-204)**. Driven by curiosity and a desire to dive deep, having read **14 technical programming books** cover-to-cover.
