

Matthew F. DeAngelo

Jack of All Trades
Master of One

Development

Design Patterns, Async vs.
Concurrent, Clean vs.
Performant Code

Architecture

Network Communication,
Migration Strategies

Operations

IIS, CI/CD, Docker

Security

Secure Designs, PenTesting,
Security First Mindset

Certifications

CompTIA Security+
Azure Developer Associate

Education

Honors Bachelors Degree
Math & Computer Science
GPA 3.89

I use Vim by the way

Work Experience

Software Engineer, Quiet Professionals April 2023 – Present

- Architected & implemented authentication/authorization for the entire web app
- Led user account migration to unify authentication methods across two networks
- Convinced the team to begin automated testing and code reviews
- Provided feedback on ~90% of all architectural concerns
- Discovered 2 security vulnerabilities via penetration testing

Software Engineer, Amazon Aug 2022 – April 2023

- Set automated alarms to identify under-provisioned systems
- Reprovisioned several DynamoDB tables saving the team \$72,000 a year
- Made changes to systems that could experience zero downtime

Forensic Software Engineer, Cipher Tech Solutions Sept 2020 – Aug 2022

- Met with clients to identify needs and determine application requirements
- Designed, wrote, and maintained multiple applications concurrently
- Presented product workflow to prospective customers and upper management
- Created solutions to problems with minimal concrete requirements

Software Developer Intern, Ajoules May 2019 – Sept 2020
Student Lecturer (Mathematics), Utah State University Jan 2017 – May 2020
Software Developer Intern, Church of Jesus Christ May 2018 – Aug 2018

Projects Owned

Identity Server – User and role management API Jul 2023 – Present

- United two authentication schemes in two different production environments
- Mixed active directory, username/password, and certificate authentication
- Migrated from windows and cookie to token authentication

Werewolf – Excel report parser Sept 2021 – Aug 2022

- Discovered a way to automate the creation of ANB network-mapping charts
- Automated ~40% of our analysts' workload freeing them for other taskings
- Worked alongside non-technical users to obtain requirements

80% Tool – Media file reducer and organizer Oct 2020 – Aug 2022

- Implemented as a set of removable modules to better enable reuse
- Developed a filtering algorithm novel to the industry that archives useless photos
- Reduces a manual workload by ~85%, yielding a ~6% faster overall response

Technical Reading

Code: The Hidden Language of Computer Hardware and Software – C. Petzold

C# Concurrency – Nir Dobovizki

Learning Domain Driven Design – Vlad Khononov

"Looks Good to Me": Constructive Code Reviews – Adrienne Braganza

Web Security for Developers – Malcom McDonald

Dependency Injection: Principles, Practices, and Patterns – Mark Seemann

Unit Testing: Principles, Practices, and Patterns – Vladimir Khorikov

Clean Code – Robert C. Martin

Pragmatic Programmer – Thomas & Hunt

Learning Modern Linux – Michael Hausenblas

More Effective C# – Bill Wagner

Eloquent Javascript – Marijn Haverbeke

Vue.js in Action – Evan You

Pro Git – Scott Chacon (In Progress)
